

First z/OS Knights tournament

Danilo Gipponi – EPV Technologies

Fabio Massimo Ottaviani – EPV Technologies

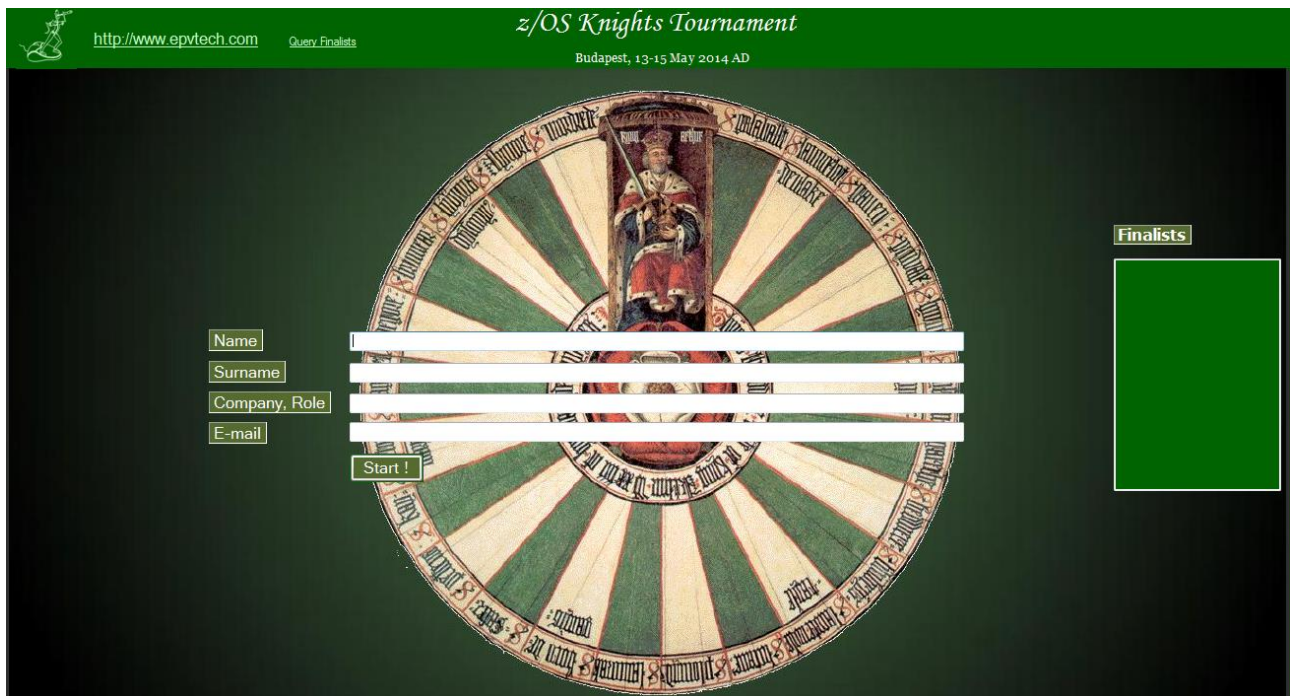

May 2014

At the last IBM z Technical University held in May in Budapest, we had our first z/OS knights tournament contest.

It consists of ten technical questions about z/OS environment.

In this document we propose the ten technical questions of the contest, and explain the answers at the end.

You may take it as a game, to check your technical knowledge of z/OS, and maybe you can find something new to learn if you miss some answer.

The screenshot shows a web browser window with a green header. The header contains the URL <http://www.epvtech.com>, a link for [Query Finalists](#), the title *z/OS Knights Tournament*, and the date *Budapest, 13-15 May 2014 AD*. The main content area features a large, ornate circular graphic resembling a tournament wheel with a central figure. To the left of the wheel are four input fields: Name, Surname, Company, Role, and E-mail. Below these fields is a button. To the right of the wheel is a button and a large green rectangular area.

So print this document and test your z/OS Knight level.

You will find the answers in the Appendix.
