

Third z/OS Knights tournament

Fabio Massimo Ottaviani – EPV Technologies

August 2016

1 Introduction

At the last IBM z Technical University held in June in Munich, we had the third edition of the z/OS knights tournament contest.

It consists of ten technical questions about z/OS environment.

In this document we propose the ten technical questions of the contest, and explain the answers at the end.

You may take it as a game, to check your technical knowledge of z/OS, and maybe you can find something new to learn if you miss some answer.

So print this document and test your z/OS Knight level.

You will find the answers in the Appendix.

If you want to receive the paper you can reply to this e-mail writing "Third z/OS Knights tournament" in the subject
