

WLM

Rome 25-26 February 2016

Abstract

This seminar is part of the EPV Performance University initiative.

It is designed to provide participants a deeper knowledge on how WLM works, a clear understanding of the many useful metrics available in SMF 72 and the ability to avoid some common errors when defining WLM parameters.

The first day will be dedicated to analyse the metrics available to control service class performance, report class accounting and resource group capping by exploiting the EPV for z/OS pages. The discussion will also focus on how to proceed to set appropriate parameters for all these WLM objects.

The morning of the second day will be dedicated to investigating the WLM classification mechanism, including the peculiar aspects of CICS and IMS transactions classification. In the afternoon, after a deep analysis of SYSTEM and SYSSTC, the most common errors found at many customer sites will be discussed by using the EPV for z/OS pages.

Audience

Even if part of the seminar will be based on the EPV for z/OS pages, all the concepts discussed will be of general interest for everyone working at improving z/OS Performance and/or WLM customization.

Subscription

The maximum number of participants is 20.

Participants will be accepted based on a first come, first served basis.

Language

Seminar language will be English

Speaker

Fabio Massimo Ottaviani has been involved in Performance, Service levels, Capacity Planning and Cost Accounting projects since 1982.

In 2002 he joined EPV Technologies to work as Technical Director at designing the EPV products suite.

He is involved in projects aimed at the performance optimization of IMS, CICS and WebSphere applications and in general of z/OS environments.

He performs periodical Capacity Planning activities at many customers sites in Italy.

Fabio Massimo Ottaviani has been involved in CMG-Italia (www.cmgitalia.it) activities since 1989 presenting many papers at CMG-Italia conferences and winning the Best Paper Award in 2001, 2004 and 2009.

He is also a frequent speaker at CMG and IBM conferences in Italy and abroad.

Fabio Massimo Ottaviani has a degree in Statistic Sciences.

Day 1	
09:30	Introduction
10:00	Analysing Service Class performance – Part 1
11:00	coffee break
11:30	Analysing Service Class performance – Part 2
12:30	Lunch
14:00	Using Report Classes
15:00	coffee break
15:30	Exploiting Resource Groups
16:30	end of day

Day 2	
09:30	WLM classification
11:00	coffee break
11:30	CICS and IMS transaction goals
12:30	Lunch
14:00	SYSTEM and SYSSTC
15:00	coffee break
15:30	Most common errors
16:30	end of day

To register to the seminar fill up this form and fax or e-mail it to EPV Technologies

- EPV Customer/Partner Euro 200,00 + VAT (if applicable)

Training course: WLM
