What our Customers say

" I learned more about my systems in one hour using EPV than in one month looking at tons of RMF reports"

"The information provided by EPV for z/OS are exactly those needed by our technicians"

"I trust my technicians but sometimes I still like to take a look at my systems"

*"EPV support is by far the best we get from any of our software vendors.
They also help us in performance issues not related to their products"*

Do you have a clear picture of what is happening on your systems?

Can you quickly identify incidents and problems in day to day operations ?

Can you forecast and prevent workload and resource utilization trends threatening your SLAs?

Get Your IT Under Control!

EPV for z/OS is what you need to improve Service and reduce Costs

EPV for z/OS major benefits

EPV for z/OS is an out-of-the-box solution which helps you control and optimize hardware, software and applications to reduce costs and improve service levels.

EPV for z/OS is based on extensive performance and capacity planning experience & knowledge, which is embedded in the product.

EPV for z/OS automatically transforms vast amounts of data into easily accessible information.

EPV for z/OS saves 90% of the time required by technical staff to identify and correct problems, do reporting and perform capacity planning studies.

EPV for z/OS increases and develops technical staff's knowledge about the newest hardware and software technologies.

It's always the right time to switch to EPV
