# EPV for z/OS

MCM

## Performance reports specific for each client

Many companies have the need to provide reports showing performance measurements to their internal or external clients.

However, they want that each client only sees data regarding the systems they are entitled to work on.

EPV for z/OS MCM (Multi Client Manager) is a quick, easy and not-expensive solution for this issue.

### Goal

EPV for z/OS MCM goal is to create, starting from the EPV for z/OS standard reports, as many web sites as needed, in just few minutes.

Each web site will be dedicated to an internal or external client, showing performance reports only for the systems of their interest.

### Input

EPV for z/OS HTML pages.

### Output

As many client web sites as needed.

### Installation

EPV for z/OS MCM runs on Windows, Linux and Unix. The installation process takes just a few seconds.

### Run

To run EPV for z/OS MCM you can execute or schedule a .bat or a .sh file

### Prerequisites

A valid license and maintenance for EPV for z/OS is also needed.

### Pricing

The product's pricing is based on the number of client web sites to produce.

# It's always the right time to switch to EPV
